

Why do ladybirds have spots?

Key knowledge Summer 1

I know the names of some insects and recognise them

I know the life cycle of an insect

I know descriptive words to talk about patterns

Key Vocabulary	Definition
Insects	A creature living outside with antennae and hard shells on their abdomen, ladybird, earwig, spider, woodlice, ant, wasp, bee, butterfly, moth
Metamorphosis	Change into another stage of life like a caterpillar to a chrysalis, larvae to a ladybird or a tadpole to a frog
Patterns	The design on an insects shell or wings – spiral, spotty, stripy, spots, stripes
